

We are value-focused. We start with the best shirts and add the best, eco-friendly inks available. Our price table is NOT based on your typical economy Gildan shirt - we price out what we actually want to print on and what our customers typically use. Therefore, this table is based on our best seller, the Bella+Canvas 3001 (which we also considered the 'best value' shirt on the market). The typical Gildan 5000 or similar comes in up to \$1.25 less than this table, based on the shirt color.

This table is a starting point. Jobs that present special challenges or special requests will be priced individually. Similarly, high volume clients may be eligible for special rates.

All-in pricing, BC 3001 Tee
